TOXICOLOGY

CONTENTS

Volume 43 (1987)

Interaction of toxic cations with the glomerulus: binding of Ni to purified glomerular basement membrane (**Nickel binds with high affinity to the anionic glycosaminoglycan sites of glomerular basement membrane**)
by D.M. Templeton (Toronto, Canada) . . . . . 1—15

Comparison of the in vivo and in vitro testicular effects produced by methoxy-, ethoxy- and *N*-butoxy acetic acids in the rat (**Testicular toxicity of these metabolites of alkoxylethanol solvents decreases with increasing chain length, in vivo and in vitro**)
by P.M.D. Foster, S.C. Lloyd and D.M. Blackburn (Cheshire, U.K.) 17—30

Acute toxicity of T2 toxin in rats, mice, guinea pigs, and pigeons (**The fungal toxin causes a number of haematological, lymphoid organ and intestinal changes**)
by S. Fairhurst, T.C. Marrs, H.C. Parker, J.W. Scawin and D.W. Swanston (Salisbury, U.K.) . . . . . 31—49

Critical prenatal periods for chlorambucil-induced functional alterations of the rat kidney (**The critical period for the induction of renal defects and hypoplasia lies on day 11 of gestation**) . . . . . .
by R.J. Kavlock, B.F. Rehnberg and E.H. Rogers (Research Triangle Park, NC) . . . . . 51—64

The chances of false negative results in conventional toxicology studies with rats (**The probability of detecting a significant effect in given parameters is investigated**)
by D.O. Chanter, M.G. Tuck and D.W. Coombs (Cambridge, U.K.) . . . . . 65—74

Studies on the effect of chronic L-triiodothyronine (T_3) treatment on brain NA^+,K^+-ATPase activity in the mature rat (**After 2 weeks of 5 mg/kg T_3 orally both molecular forms of brain ATPase are moderately increased**)
by C.K. Atterwill, C.G. Brown and P. Collins (Herts, U.K.) . . . . . 75—91

Guinea pig pulmonary response to sensitization by five preformed monoisocyanate-ovalbumin conjugates (**Two monoisocyanates increase respiratory sensitivity while other do not**)
by J. de Ceaurriz, P. Ducos, J.-C. Micillino, R. Gaudin and C. Cavelier (Vandoeuvre, France) . . . . . 93—101

Editorial Acknowledgement . . . . . 103—106

Book Reviews . . . . . 107—109

Contents of journals relating to Toxicology . . . . . 111—115

The relative importance of N-oxidation and N-demethylation in the metabolism of trimethylamine in man (**N-oxidation is by far the most important metabolic pathway**)
by M. Al-Waiz, S.C. Mitchell, J.R. Idle and R.L. Smith (London, U.K.) . . . 117—121

Studies of immune function of CD-1 mice exposed to aflatoxin B_1 (**Aflatoxin suppresses B- and T-cell functions, with a greater effect on T-cells**)
by R.V. Reddy, M.J. Taylor and R.P. Sharma (Logan, UT) . . . . . 123—132

Teratogenicity of flubendazole in rats (**Flubendazole produces a variety of fetal malformations**)
by H. Yoshimura (Tokyo, Japan) . . . . . 133—138
Metabolism of 2- and 3-*tert*-butyl-4-hydroxyanisole (2- and 3-BHA) in the rat (I): excretion of BHA in urine, feces and expired air and distribution of BHA in the main organs (**Excretion of BHA is rapid, 4-O-methyl demethylation occurs and the demethylated methyl group shows a non-specific distribution**)
by M. Hirose, A. Hagiwara, K. Inoue, T. Sakata, N. Ito, H. Kaneko, A. Yoshitake and J. Miyamoto (Nagoya and Hyogo, Japan). . . . . 139—147
Furosemide toxicity in isolated mouse hepatocyte suspensions (**Furosemide-induced cytoplasmic and cell surface lesions in vitro are similar to in vivo changes and glutathione depletion may be important**)
by T.E. Massey, R.M. Walker, T.F. McElligott and W.J. Racz (Ontario, Canada). . . . . 149—160
Carotid sinus reflexes in rats given small doses of lead (**Low level lead poisoning changes blood pressure and heart rate and increases the sensitivity of muscarinic receptors to blockage**)
by A. Skoczyńska, J. Szechiński, W. Juzwa, R. Smolik and F.J. Běhal (Wroclaw and Gdansk, Poland and Lubbock, TX) . . . . . 161—171
Mutagenicity of MPTP (1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine) and its metabolites (**MAO-catalyzed oxidation to a reactive dihydropyridinium species ($MPDP^+$) yields a mutagenic product**)
by J.R. Cashman (San Francisco, CA) . . . . . 173—182
The influence of sodium ascorbate, menadione sodium bisulfite or pyridoxal hydrochloride on the toxic and antineoplastic action of *N*-methylformamide in P 388 leukemia or M 5076 sarcoma in mice (**The toxic and antineoplastic actions of *N*-methylformamide can be moderately altered**)
by H. Osswald, R. Herrmann and M. Youssef (Heidelberg and Berlin, (F.R.G.) . . . . . 183—191
Identification of the cooked food mutagen 2-amino-3-methylimidazo[4,5-*f*]-quinoline (IQ) and its N-acetylated and 3-N-demethylated metabolites in rat urine (**The major metabolites are identified in rat urine**)
by J.-C. Peleran, D. Rao and G.F. Bories (Toulouse Cedex, France). . . . . 193—199
Effects of *O,S,S*-trimethyl phosphorodithioate on immune function (**OSS-TMP is not an immunosuppressive agent**)
by K.E. Rodgers, N. Leung, C.F. Ware and T. Imamura (Riverside, CA) 201—216
Effect of butylated hydroxyanisole on in vitro and in vivo nitrosation of dibutylamine (**While BHA inhibits nitrosamine formation in vitro it does not do so in vivo**)
by L. Airoldi, R. Pastorelli, A. Macrì, M. Bonfanti and R. Fanelli (Milan, Italy) . . . . . 217—225
Contents of journals relating to Toxicology . . . . . 227—228
Announcements . . . . . 229—230

Review Paper
Dimethylformamide (DMF) hepatotoxicity (**Signs of DMF intoxication in humans are described**)
by V. Scailteur and R.R. Lauwerys (Brussels, Belgium). . . . . 231—238
Alkylformamides as inducers of tumour cell differentiation — A mini-review (**There seems to be a relationship between molecular weight and effect**)
by. S.P. Langdon and J.A. Hickman (Birmingham, U.K.). . . . . 239—249

Research Papers
Induced synthesis of metallothionein by ascorbic acid in mouse liver (**Pre-**

injection of mice with L-ascorbic acid protects against a lethal dose of cadmium)
by S. Onosaka, D. Kawakami, K.-S. Min, K. Oo-Ishi and K. Tanaka (Kobe, Japan) . . . . . 251—259

A quantitative evaluation of the neurotoxic effect of silver on the volumes of the components of the developing rat hippocampus **(A tissue volumetric method shows that silver affects only the pyramidal cells of neonatal hippocampus)**
by J. Rungby, L. Slomianka, G. Danscher, A.H. Andersen and M.J. West (Aarhus, Denmark) . . . . . 261—268

In vitro effects of 2,5 hexanedione on a melanoma cell line: A morphological study **(The solvent induces cytotoxicity in cell culture)**
by W. Malorni, G. Formisano and A. Molinari (Rome, Italy) . . . . . 269—282

Teratogenic evaluation of triclabendazole in rats **(No evidence was found for embryocidal or teratogenic effects)**
by H. Yoshimura (Tokyo, Japan) . . . . . 283—287

Formation and accumulation of O^6-ethylguanine in DNA of enriched populations of Clara cells, alveolar type II cells, and macrophages of hamsters exposed to diethylnitrosamine (O^6-ethylguanine accumulates in Clara cells)
by A.T. Fong and R.E. Rasmussen (Irvine, CA) . . . . . 289—299

Effects of prenatal and postnatal exposure to gentamicin on renal differentiation in the rat **(Gentamicin inhibits the development of kidney function)**
by T. Gilbert, M. Lelievre-Pegorier, R. Malienou, A. Meulemans and C. Merlet-Benichou (Paris, France) . . . . . 301—313

Differential induction of cytochrome *P*-450 catalyzed activities by polychlorinated biphenyls and benzo[*a*]pyrene in B6C3F$_1$ mouse liver and lung **(Different cytochrome *P*-450 isozymes are responsible for monooxygenase and nitroreductase activities and route of administration is important in expression of activities)**
by C.E. Mitchell, J.P. Fischer and A.R. Dahl (Albuquerque, NM) . . . . . 315—323

Effect of tridiphane on reproductive parameters in Fischer 344 rats **(No consistent adverse effects on reproduction, fertility neonatal survival or growth were seen)**
by J.A. John-Greene, T.K. Byrd, B.H. Scortichini, J.T. Young and K.S. Rao (Research Triangle Park, NC, Midland, MI and Freeport, TX) . . . . . 325—335

Contents of journals relating to Toxicology . . . . . 337—338

Announcements . . . . . 339—340

Subject Index Volume 43 . . . . . 341—345
